WHAT WE DO

Business Process (Re-) Engineering

We support our clients to re-engineer their business process with the goal of improving product output, quality, or reducing costs, etc. Business Process re-engineering involves the analysis of organization workflows, finding processes that are sub-par or inefficient, and figuring out ways to get rid of them or change them.

IT CONSULTING

At IICS Technologies we use the expertise and deep tech background of the best minds to create a comprehensive IT strategy for a digital and technological transformation of your organization that goes in line with your business objectives. Our strategic IT consulting will help you automate and digitalize operations, optimize the software portfolio, and implement the latest technologies.

Product Engineering

Poorly designed computer software systems stress out employees and impede productivity. We invite you to leverage our decade-long expertise in enterprise software development, API integration, modernizing legacy systems, and consolidating app portfolios.

USER INTERFACE DESIGN

If you want to build your product with a team that establishes a clear design process, meets deadlines, and delivers on time, IICS Technologies is your right partner. Our design team will help you build an engaging product easily and quickly.

Company Profile

ISO 9001:2015 CERTIFIED COMPANY

Transformational Digital Solutions

OUR PRODUCTS

We develop technologies to enhance service delivery for both public and private organizations ensuring efficiency in operations. Some of our key products we have developed for the health and Education sectors include:

A) INTEGRATED HOSPITAL MANAGEMENT INFORMATION SYSTEM (iHMIS)

The Government of Uganda for long, worked towards digitizing Health Services Delivery and improving accountability in Government Hospitals. IICS Technologies developed an Integrated Hospital Management Information System Software (iHMIS) as a means of achieving the digitization of the Health Service Delivery in Uganda.

The system is designed to improve service delivery and management of operations in hospitals including management of patient records, management of medicines and health supplies; management of health workers' performance whose responsibilities are supported by the system; integration of staff attendance and monitoring of Time-On-Task.The system provides data in real time.

B) SCHOOL MATE

Schoolmate is an integrated automated school management system developed for schools. It enables a smooth workflow of operations in the school and provides real time information.

CUSTOMER VALUE PROPOSITION

We are committed to innovating and developing customer centric user friendly software solutions for everyone, everywhere.

ABOUT US

◊ Integrated Intelligent Computer Systems Technologies (IICS) is a software engineering and IT consulting firm that develops cutting edge software and IT solutions.

◊ Our primary and singular objective is therefore to engineer computer systems that address the challenges of our clients.

◊ Our passion is in supporting both private and public entities in their quest to work smarter and improve service delivery.

◊ We are visionary and reliable partners that will focus on driving your agenda.

OUR VISION

IICS Technologies aspires to support communities with simplified results oriented IT and software solutions that enhance productivity and decision support.

MISSION

To engineer innovative solutions that improve efficiency and effectiveness of service delivery while ensuring value for money for stakeholders.
